

Photovoltaic cleaning roller brush configuration/parameters

X41 Household electricity version

Accessory kits

15 meters of water Tube + valve

Telescopic rod 3.5M / 5.5M / 7.5M /

Extend the electricity Source line 8 meters

100v-240v to 24v Power converter

Equipped with a power converter and 8 meters of wire, it can be used by connecting to 100v-240v AC, and can be directly connected to the water source / the pump can be purchased separately.

X42 Lithium battery version

15 meters of water Tube + valve

Lithium battery pack

Accessory kits

Telescopic rod 3.5M / 5.5M / 7.5M /

Electronically controlled spring wire

charger

knapsack

Equipped with a set of piggyback lithium battery packs, 24V/26ah, about 4 hours of battery life; can be directly connected to the water source / can be purchased separately from the pump.

X43 Dual-purpose version

Accessory kits

Lithium battery pack

charger

15 meters of water Tube + valve

Telescopic rod 3.5M / 5.5M / 7.5M /

Electronically controlled spring wire

Extend the electricity Source line 8 meters

100v-240v to 24v Power converter

knapsack

The combination of lithium battery version and mains version provides two power supply solutions, free choice, direct connection to water source / separate optional pump.

The product name	Electric double head photovoltaic cleaning machine (Brushless motor version)	
Telescopic rod	Length (M):1.5/1.8/2.1 Diameter (MM):36/39.5/43	Number of stanzas (section):3/4/5 Wall thickness:1mm Material:Aluminum alloy
Drive the motor	Name:DC motor Voltage:DC24V	Total power:300W Rotate speed:350/min
Brush head	Brush disc diameter(CM):32 Cleaning width (CM):65	Service life:1-2 years (Frequency of use) Material: Nylon wire
Wire water pipes	Wire (M):Household electricity 16 Lithium battery 8	Water pipe (M):8
