

# 5.12~40.96 kWh

## STACKABLE LIFEPO4 BATTERY MODULE

An advanced LFP battery delivering safe, long-lasting, and reliable energy storage for solar and backup power.

 ≥6000 Cycles life

- Continuous Power: 10kW, Peak: 12kW (30s)
- Warranty: 12 years
- Modular stack design, easy plug & play installation
- Real-time monitoring, remote firmware updates & maintenance
- Safe cobalt-free LiFePO4, >6000 cycles @80% DOD (25°C)
- Independent BMS per module
- Compatible with 15+ popular inverter models
- Scalable up to 8 units (max 40.96kWh)

\* Variations in dimensions and weights may occur due to production batches.

GENERAL

|                         |  |
|-------------------------|--|
| Battery Type            | Cobalt Free Lithium Iron Phosphate (LFP)             |
| Nominal Voltage         | 51.2V  |
| Operating voltage Range | 44.8~56.8V   |
| Install location        | Indoor or outdoor without sunlight exposure          |
| Installation Mode       | Floor installation, Stackable                        |
| Operation Temperature   | Battery discharge: -20~60°C, battery charge: 0~ 50°C |

## FEATURES

|                           |   |
|---------------------------|---|
| BMS Monitoring Parameters | SOC, System voltage, current, cell voltage, cell temperature, PCBA temperature measurement ,SOH |
| Communication Port        | CAN/RS485/BLE   |
| Warranty                  | 12 years (standard warranty) (25 °C)  |
